

SUMMARY

Innovative Full Stack Developer with deep understanding of front-end and back-end technologies. Excels in creating robust, user-friendly applications and solving complex coding challenges. Brings collaborative approach to projects, enhancing team productivity and delivering high-quality results. Proven ability to drive digital transformation and elevate user experience through cutting-edge solutions.

SKILLS

- HTML/CSS
- JavaScript
- UI/UX design
- Version control (Git)
- React JS
- Angular
- Node JS
- Springboot
- MongoDB
- MySQL

EXPERIENCE

Full Stack Developer

Rhym Technologies *Jul 2023 – Present*

Cyber Risks Analysis and Mitigation Suite

- Designed and developed dynamic and interactive modules for multiple dashboards like ECS,CAP,VAPT,TIP and SOC
- Built robust server-side applications with Node.js, ensuring seamless data integration with MongoDB databases.
- Spearheaded application deployment using AWS and Azure DevOps, ensuring high availability, scalability, and secure hosting.
- Developed the External Cyber Score (ECS) module to allow users to request scans, assess risks, identify threat actors, and receive detailed remediation plans.
- Built the Compliance Assessment Platform (CAP) to automate compliance checks and generate actionable reports, improving efficiency for end-users
- Designed real-time SOC dashboards to monitor security incidents and provide actionable insights to analysts.

Student Management System

- Designed and developed user friendly interfaces for multiple modules including Student Admin and Compliance to deliver a seamless experience to users
- Built responsive front-end layouts optimized for different devices, ensuring accessibility and usability for a diverse user base.
- Enhanced performance by leveraging lazy loading and efficient data binding, resulting in faster load times and smoother navigation.
- Delivered all modules on time and within scope, earning positive feedback from the client for timely delivery and adherence to quality standards.
- Actively participated in client discussions to refine requirements, provide regular updates, and ensure that the application met their expectations.

- Contributed to a significant increase in user engagement through intuitive UI/UX design, as evidenced by user feedback and analytics.

Programmer Analyst

Cognizant Technologies *Aug 2021 - Sep 2022*

Insurance Policy Management Dashboard

- Assist in designing and building responsive and user-friendly interfaces using frameworks like React.js or Angular for insurance dashboards.
- Collaborate with the back-end team to integrate APIs and display real-time insurance data (e.g., policy details, claims, analytics) in the dashboard.
- Utilize charting libraries like Chart.js, D3.js, or AmCharts to present data visually
- Perform unit and integration testing to identify and fix UI bugs, ensuring smooth dashboard functionality.
- Work closely with stakeholders to understand insurance workflows, user roles (agents, customers, admin), and dashboard requirements.

EDUCATION

Bachelor of Technology(ECE)

MLRIT *Jul 2017 - Jul 2021*

9.2 CGPA

Intermediate

Sri Chaitanya Junior College *Jun 2015 - Jun 2017*

98%

SSC

Raos High School *Jun 2014 - Jun 2015*

9.8 CGPA
